### REACH regulation (EC) No. 1907/2006 – Substances of very high concern (SVHC) AIREX<sup>®</sup> Flexible Foams

To whomever it may concern

The new chemicals regulation of the European Union (REACH regulation) came into force on June 1, 2007. The objective of the REACH regulation is the Registration, Evaluation, Authorisation and Restriction of CHemicals by the European Chemicals Agency (ECHA). The principal aim of REACH is to improve the protection of human health and the environment from the risks that can be posed by chemicals.

Airex AG pursues exactly the same objective with one of its corporate principles ("EHS first" - Environment, Health and Safety) and will support customers and suppliers in implementing the REACH regulation:

- In the supply chain of the AIREX<sup>®</sup> range of flexible foam products, Airex AG is not a manufacturer of chemical substances on their own but a downstream user who utilizes and processes chemical substances and preparations delivered to us.
- Airex AG collaborates closely with its suppliers to ensure that all preliminary products used in the production are in compliance with the REACH regulation and that there won't be any disruptions in the availability of the AIREX<sup>®</sup> range of flexible foam products. Our suppliers confirm that the chemical substances and preparations delivered to Airex AG have been registered.
- Airex AG herewith confirms that the AIREX<sup>®</sup> flexible foam products do not contain any of the substances appearing on the Candidate List of Substances of Very High Concern (SVHC) issued by ECHA on January 12<sup>th</sup> 2017 above a concentration of 0.1% (w/w).

We remain at your disposal to provide any additional information you may require.

Sincerely

Airex AG
